Welcome home!

Residential flooring by Domco®

From the warm and inviting tones of traditional, classic elegance to the clean lines of modern interiors, Domco has the right choice of resilient sheet flooring to reflect your style. Choose from multiple superb collections to complement your personal taste, your room decor and your budget.

Domco. In touch with your lifestyle.

Features & Benefits

- A large selection of colors and styles – choose from wood grains, slate, stone & ceramic tile finishes or from Domco’s vast selection of traditional patterns and colors
- Realistic, dimensional texturing
- Highly durable and simple to maintain
- Superior resistance to scuffs, scratches and stains
- Installs with or without adhesive
- Affordable
- Domco’s Extreme Performance Warranty

The FloorScore

The FloorScore program tests and certifies flooring products for compliance with indoor air quality emission requirements. A flooring product bearing the FloorScore seal has been independently certified by SCS to comply with the volatile organic compound emissions criteria of the California Section 01350 program. These flooring products qualify for use in high performance schools and office buildings. Thus, products with the FloorScore seal have passed a third party certification process and are recognized as contributing to good indoor air quality in order to protect human health.

Tritonite® Plus

Tritonite Plus provides resilient vinyl floor covering with an unmatched level of protection, thanks to a revolutionary ceramic technology. Domco has embedded millions of ceramic microspheres into urethane wear-layer, effectively fending off scratches and abrasions. This extraordinary protection is combined with a remarkably easy maintenance. Just damp mopping with Domco Sureshine® cleaner for an impeccable finish without waxing.

Gemglaze

Gemglaze No-Wax vinyl finish is a high-performance polymer-enhanced wear layer that brings resilient flooring a lasting

natural look. This great finish is accompanied by easy no-wax maintenance, for enjoyable flooring that will remain for a long time.

LifeGard® Protection

Domco’s exclusive LifeGard protection is present throughout all layers of the flooring. It provides superior resistance to scratches, scuffs and stains; an advanced foam layer for protection against rips, tears, gouges and indentations as well as a reinforced backing for superior protection against moisture and bottom-up staining.

A Collection and Warranty for every style, every Budget.

Domco’s Extreme Performance Warranty

Extreme Performance Warranty System for residential installations assures purchaser that its floor covering product:

- Will not wear out. (see wear definition)
- Will be free of manufacturing defects.
- Will not rip, tear, gouge or indent from normal household use. (when installed directly over wood and concrete subfloors). See exclusions.
- Will not permanently stain from common household stains and traffic stains including asphalt driveway sealers.
- Will not stain from moisture (installations on concrete only - see excessive moisture definition).
- Will not permanently stain from recommended underlayment panels.
- Will not permanently scuff from shoe soles.

Habitat

FiberFloor™ ... a new and unique product choice from Domco®

FiberFloor features a new construction technology that integrates beautiful styles and finishes and a warm, comfortable surface with unmatched wear-resistance, easy installation and carefree maintenance. Choose from timeless elegant wood grain and ceramic finishes or from Domco's vast selection of traditional patterns and colors.

Features and benefits:

- Dimensionally stable: will not contract, expand or curl
- Easy to install: very flexible, no adhesive required in most applications
- Less preparation required: construction reduces telegraphing subfloor imperfections
- Superior tear and indent resistance
- High sound absorption
- Can be installed in humid areas
- Resistant to moisture

Flooring with optimum versatility

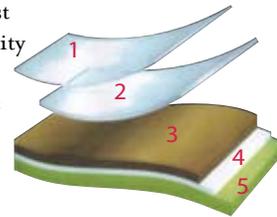

Urethane finish (1) including ceramic microspheres for superior resistance to scratches, scuffs and stains, and ease of maintenance.

Thick wearlayer (2) that assures high durability against wear, rip, tear, gouge and indentations.

Foam layer (3) treated against mold and mildew. Allows warmth and comfort underfoot.

Fiberglass interlayer (4) provides dimensional stability.

Vinyl back (5) also treated against mold and mildew, provides stability and high flexibility. It allows installation in humid areas where other flooring alternatives will not perform.

FiberFloor™ Glueless Installation Tips

- Flooring can be transported rolled face in or out on a sturdy core.
- Room temperature shall be no less than 65°F (18°C) during installation.
- FiberFloor™ may be installed over gypsum based underlayments using the Glueless Installation System.*
- Undercut door moldings to allow flooring to slide under the molding.
- Unroll the flooring in the room and allow it to relax approximately 20 minutes before fitting. To reduce this waiting time, the flooring may be back rolled (pattern side in) on a core prior to transporting to the jobsite.

* When installing Influence in a commercial application the material must be adhered using DT-Vinylbond™. For detailed instructions, please refer to the Domco installation manual.

- Long lengths of flooring may have a tendency to bow or twist during layout or positioning. Use caution to insure that the material is lying completely flat and is aligned squarely within the room before final fitting and/or cutting of seam.
- Leave a 1/8" - 1/4" space between flooring and all verticals (i.e. walls, cabinets, pipes, etc.).
- Do not fasten cabinets through FiberFloor™.
- DO NOT PERIMETER BOND FIBERFLOOR™.
- Once seam overlap is achieved, place strips of masking tape across the seam to prevent shifting. Seams are cut using the double-cut dry method only. **Do not straight edge and butt seams.**
- Multiple seams over wood construction are fastened using Domco S870 Floating Seam Tape.

- One seam over wood construction and multiple seams over concrete are fastened using Domco S860 Seam Tape.
- If an installation requires the floor to be net fit, the flooring must be fully adhered using Domco DT-VinylBond™ Adhesive.
- Install wood moldings or cove base around the perimeter to cover the space. Do not nail moldings through FiberFloor™. Nail into the wall.
- Install doorway transition moldings. Do not nail through FiberFloor™.
- Seal seams with Domco DT-25 Seam Sealer for materials with high gloss finish and Domco DT-65 Seam Sealer for materials with low gloss finish.
- Carefully inspect for any fullness in the flooring. Re-trim if necessary.

*It's 10 am.
Your new floor's installed.
What will you do with the rest of your day?*

Your Complete Floor Care and Residential Warranty Information Section

Residential Sheet Floors Warranties

RESIDENTIAL FLOORS

Consumer Warranties

Domco products are backed by a comprehensive consumer protection program. This warranty program is your assurance that the Domco floor you have selected will perform as rated.

The construction and durability of each floor, combined with its warranty, determines a Domco floor's rating.

If you should have a valid warranty claim, Domco will provide you with new flooring material of the same or similar product free of charge, and will pay a reasonable labor charge to install it, as specified in your warranty. We give you all of this protection so you can buy your new Domco floor with peace of mind.

Even Domco's advanced generation of floors need regular care to look and wear their best. First, make sure your Domco floor is professionally installed, using only Domco-approved adhesives and materials. Then, be sure to follow a program of regular care, following maintenance instructions described in this booklet. These sensible steps will assure you that your new floor will deliver outstanding performance and provide you years of beauty and lasting satisfaction.

General warranty information, including definitions and exclusions, can be found on the following pages.

All Domco Warranties

- Cover flooring material graded and sold as "Regular" or "First Quality" for its recommended use.
- Cover the flooring material from the date of original purchase for the time period specified.*
- Limit to one (1) replacement floor – See Warranty Support.

* Note: Labor costs, when covered by the warranty, will only be covered if professional installation was paid for when the original floor was installed.

Green Category

6-Year Limited Warranties

Customflor[®]

Covers material and reasonable labor when professionally installed. **Covers one replacement.**

From the original date of purchase, according to the terms above, our red, purple, blue, orange, and green categories:

- Will not wear out. (see wear definition)
- Will be free of manufacturing defects.
- Will not rip, tear, gouge, or indent from normal household use (when installed directly over wood and concrete sub-floors). See exclusions.
- Will not permanently stain from common household stains and traffic stains including asphalt driveway sealers.
- Will not stain from recommended underlayment panels.
- Will not stain from moisture (installations over concrete only-see excessive moisture definition).
- Will not permanently scuff from shoe soles.

... peace of mind.

Limited Warranty Descriptions

Wear – or wear out is defined, for purposes of this warranty, as wear to the extent that the flooring’s wearlayer is completely worn through and the pattern is lost by normal household traffic. Note: Normal household use is defined as common daily activities in the home. Loss of gloss due to scratching, abrasion and dulling from a film build-up are maintenance concerns and are not covered. Damage from narrow heels is considered as a misuse and is not covered. Women’s narrow-heeled shoes can cause permanent damage to many types of flooring including resilient, wood, ceramic, and carpet. Stains from dyes in cotton or rubber-backed or latex-backed rugs are not covered.

Manufacturing Defects – Manufacturing defects are defined, for purposes of this warranty, as visual or construction deficiencies resulting from the manufacturing process.

Moisture Staining (concrete only)

Will not discolor from mold, mildew or alkali. Excessive moisture is not covered. See excessive moisture definition.

Underlayment Panel Staining

Will not discolor from recommended underlayment panels. (see installation manual).

Household/Asphalt Staining

Will not permanently stain from common household stains and asphalt stains including asphalt driveway sealers.

Excessive Moisture Definition

Excessive moisture is defined for purposes of Domco’s Limited Warranty as moisture vapor exceeding 3 lbs./1000 sq. ft./24 hrs. when tested by the ASTM F-1869 Calcium Chloride test procedure or 75% when tested to ASTM F-2170. The test kit is used prior to the installation of flooring. The use of the Protimeter Moisture Meter is a non-destructive tool used to test for presence of moisture beneath installed flooring. For floors installed on concrete, readings above 20 on the Protimeter scale indicates excessive moisture.

- Moisture warranty applies only to installations on concrete. Does not cover installations over existing floors or wood substrates.

More Residential Sheet Floor Warranties

Brilliant®

- 1-Year Wear and Manufacturing Defects Limited Warranty.
- Covers material only, not labor.

Domco DT Adhesives

Domco warrants its floor covering against bond failure when DT Adhesives, seam sealers, and proper notch size trowels are used to install Domco sheet flooring in accordance with Domco’s recommended installation guidelines. With subsequent failure directly related to the performance of our DT Adhesives, your floor will be replaced and/or repaired at our expense in accordance with Domco’s recommended repair and replacement guidelines. The warranty term is for the same period as the warranty term on the Domco sheet flooring used in conjunction with DT Adhesives.

Treating Stains and Spills

The following steps should be followed to remove or minimize permanent damage from stains and spills.

Note: As with any floor, immediate attention to stain removal is of the utmost importance.

Stain, Spill or Mark

Scuffs and Surface Marks

Rubber Heel Marks

Remedy

- Scuff marks not removed by routine cleaning can easily be handled with Fantastik® or Direct® multi-purpose cleaners. Apply directly, let stand for 10-15 seconds and remove with clean damp cloth.
- Some marks may require a small amount of mineral spirits* applied on a clean cloth. If necessary, apply SureShine High-Gloss or Satin Finish Polish to restore gloss.

Household Stains

Staining agent must be identified Alkalis, Blood, Catsup, Mustard, Food Dye, Fruit Juice, Rust

Remedy

- Apply SureShine® Cleaner or mild detergent full strength with a wet cloth or sponge.
- Treat stubborn stains with a 1 to 1 concentration of water to liquid bleach on a saturated cloth for up to a maximum of one hour. Rinse.
- If necessary, apply SureShine® High-Gloss or Satin Finish Polish to restore gloss.

Paints and Solvent Stains

Hair Dye, Iodine, Mercurochrome, Nail Polish, Oil-Based Paints, Wood Stains

Remedy

- Remove excess at once, rub lightly with a clean white cloth soaked in mineral spirits.*
- Clean with SureShine® Cleaner and apply polish if necessary.

Fantastik® is a registered trademark of Dow Brands. Direct® is a registered trademark of L & F Products, Montvale, New Jersey.

Miscellaneous Stains

Adhesives, Asphalts, Candle Wax, Grease, Oil, Tar

Remedy

- Scrape residue with putty knife being careful not to scratch the floor.
- Rub lightly with cloth soaked with mineral spirits,* then use isopropyl alcohol* on a clean cloth.
- Clean with SureShine® Cleaner and apply polish if necessary.
- Asphalt-Tar - Clean with Mineral Spirit.

* Caution: Mineral spirits and alcohol are flammable solvents. Follow cautions on container.

Caution:
Casters on portable appliances, dishwashers and microwave carts can cause damage to resilient floors. Glueless floors may distort. Use extreme caution when moving these items around on any resilient floor. Glueless floors are not warranted for damage or bunching caused by casters, action and movement of large appliances or furniture.

Caring for Your New Domco Residential Sheet Floors...

This Warranty Section is a guide to help you care for your new floor. It includes floor care procedures and warranties. Please read carefully. We thank you for choosing a Domco floor.

Basic Floor Protection

Immediately After Installation

- Do not replace frequently moved furniture or allow heavy traffic for at least 24 hours if adhesive is used for installation.
- Protect and do not disturb sealed seams for at least 24 hours.

Moving Heavy Furniture and Appliances

When moving heavy furniture or appliances over full spread or glueless, place plywood or hardboard panels on the floor and "walk" objects across the panels to avoid scratching or damaging your floor. **Never slide furniture directly over your floor.**

Furniture Rests

Frequently moving furniture and appliances may cause scratches or indentations in your new floor unless proper rests, glides or casters are used. Metal domes and furniture rests with small, narrow or worn surfaces should be replaced with wider, smooth, non-staining, protective load-bearing devices.

Maximum recommended stationary load is 75 lbs. per square inch for all Domco residential flooring.

Example: If the pressure applied on a table leg is estimated to be 50-75 lbs, the furniture rest should be 1" square or 1-1/8" in diameter.

Sunlight

As with other household furnishings including furniture, carpets, wallpaper, and curtains, repeated exposure to direct sunlight may cause bleaching or discoloration. Close drapes or blinds to block direct sunlight.

Area Rugs

Damage may occur due to stains from rubber and some latex backings and dyes used in floor mats and rugs.

Routine Maintenance

- Sweep or vacuum regularly to remove dirt and grit that can abrade or scratch your new floor.
- Wipe up all spills promptly and thoroughly with a damp cloth or mop.
- Wash your floor using SureShine Cleaner or a suitable mild detergent.
- Mats and rugs: Non-staining mats are helpful in removing harmful grit at entryways and can help prolong the life of your floor.

Loss of Gloss

Over time, flooring in high-traffic areas and around chairs that are frequently moved may suffer gloss reduction. Gloss levels are reduced if flooring is scratched or abraded. To restore high-gloss or satin finish floors to their original appearance, simply vacuum, wash the floor with cleaner and apply 2 or 3 coats of SureShine High-Gloss or Satin Finish Polish or acrylic polish.

Warranty Section

Damage From Narrow-Heeled Shoes

Women's narrow-heeled shoes can cause permanent damage to many types of flooring including resilient, wood, ceramic and carpet. Damage from narrow heels is considered misuse and is not covered under any warranty.

Protect Your Floor Against Extreme Heat

Home appliances such as refrigerators and heating system air ducts emit a direct flow of hot air that, if not controlled, can exceed 120° F. This condition may cause discoloration over time. Keeping refrigerators free of dust build-up around motors and exhaust areas will greatly reduce heat build-up. Forced-air heating system dampers should be adjusted to control outlet temperature to a maximum 100° F. Cigarettes, matches and other hot objects dropped on the floor can also cause permanent damage.

Preventing Permanent Stains

- Wipe up spills promptly with a damp cloth or mop.
- The rubber backing or dyes used in some floor mats, floor paints and driveway sealers can permanently stain your floor.

How to Make a Claim

If you need to make a warranty claim, provide the retailer/contractor who sold you the flooring with written notice describing the problem along with proof-of-purchase. If you are unable to contact your retailer/contractor or are not satisfied with the response received, contact our Claims Department as shown.

Domco USA

Claims Department

1139 Lehigh Avenue, Suite 300, Whitehall, PA 18052.

Domco CANADA

Claims Department

Warranty Support

Defective material will be repaired or replaced with the same product, design and color, if available. If unavailable, Domco reserves the right to select and supply a similar Domco product. Domco reserves the right to have the floor repaired or replaced using Domco recommended techniques for that product.

These limited warranties are in lieu of any other expressed warranties and in lieu of any implied warranties including implied warranties of merchantability and fitness for a particular purpose or use. No representative, employee or agent of Domco or any other person is authorized to assume for Domco any liability or responsibility with respect to Domco residential sheet flooring, or adhesives, in addition to that described above. In no event shall Domco be liable for indirect, special, consequential or incidental damages of any kind, no matter what the cause. By this we mean that Domco will not pay for or cover any loss, expense, or damage other than to the flooring itself that may result from a defect in the flooring. Some examples are: removal and/or replacement of subfloors, trim moldings, connecting/reconnecting appliances or fixtures, or moving furniture.

Some states do not allow limitations or disclaimers as to implied warranties, so the above limitations or disclaimers may not apply in your case.

Some states do not allow the exclusion or limitations of incidental or consequential damages, so the above limitations may not apply in your case.

Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply in your case.

These limited warranties give you specific legal rights, and you may have other rights which vary from state to state.

In the event Domco disagrees with your claim, Domco reserves the right to submit the matter to arbitration by a qualified, impartial third party.

What is Not Covered

- Dissatisfaction due to improper maintenance, improper installation, irregularities or stains caused by subfloor contamination. Recommended installation instructions are available from your retailer, website or by writing Domco.
- Loss of gloss.
- Damage due to stains, cuts, gouges, scratches, punctures, tears, indentations caused by loads exceeding the recommended static load limit, fading or other resulting problems from excessive exposure to sunlight or ultraviolet light.
- Damage due to stains from rubber backing or dyes used in floor mat and rugs.
- Damage resulting from lack of or improper furniture rests and floor protectors, and movement of large appliances and furniture without proper protection.
- Extremely high pressure exerted by narrow heels will damage wood floors, resilient floors and other commercial floor coverings. Domco will not accept claims for damage caused by narrow-heel or high-heel traffic.
- Damage due to heat generation from refrigerators or heating units (including burns), as well as damage caused by household accidents or misuse.
- Color, gloss, embossing and design variation from samples and printed illustrations to the exact product installed. Variations in color may result from different light sources.
- Non-compliance with installation and/or usage as recommended.
- Damage and discoloration due to excessive moisture conditions.
- Installation related damages such as creases and seams failures.

** Products not shown in this brochure.

- Labor on merchandise installed with obvious visible defects or not professionally installed.
- Flooring material not installed residentially, or in non-recommended light commercial applications.
- Discoloration or damage caused by adhesives or floor care products not recommended or distributed by Domco.
- Flooring qualities which are other than "Regular" or "First Quality."
- Domco does not warrant installation of sheet flooring over gypsum-based underlayments or lightweight aggregate concrete having a dry density of less than 90 lbs./cubic foot.
- Rip, tear and gouge, or misuse (for example, boots with cleats or spikes, vacuum cleaner beater bar, damage from caster wheels and dropping of heavy or sharp objects or moving appliances without protection).
- Damage caused by household accidents (for example fire, flooding)
- Problems due to mold, mildew, alkaline substances or hydrostatic pressure (moisture vapor) in concrete floors which exceeds 3lbs./1000 sq. ft./24 hrs., when tested by ASTM F-1869 Calcium Chloride test procedure or industry recognized meters or installations over wood underlayment panels.
- Original limited warranty for wear and manufacturing defects applies to all replacement floors except in the situation where a floor is discolored due to mildew growth and alkali. Should the replacement floor discolor again, the floor will not be replaced at Domco's expense. This recurring situation indicates that the floor should not have been installed in this location.

If a defect is verified, Domco will arrange for repair or replacement with new material of same color, design and grade, if available, according to the Limited Warranty of your Domco Flooring. If unavailable or discontinued, Domco reserves the right to select and supply similar Domco material.
